

Disabled Access Plan

1. Approach and Car Park

There are no steps into the school from the car park, therefore there is wheelchair access. From the playground area there is a ramp which will give access to all areas. There is an area designated for disabled drivers in the car park.

2. Reception Area

A low level counter is provided and access for wheelchair users into the hall area and classrooms is available. Floor surfaces throughout are non-slip.

3. Accessible WC

There is a disabled toilet with access for wheelchairs by the school office.

4. Classrooms

There is good visual contrast in all the rooms. Door widths allow access for wheelchair users and there is sufficient room to provide wheelchair turning space within the classroom areas. There is access to the external classrooms.

5. Assembly Hall

Door widths allow access for wheelchair users and there is sufficient room to provide wheelchair turning space within the area.

6. Access to our two upstairs classrooms

There is an EVAC chair to enable the mobility impaired to be able to access our two upstairs classrooms.
