16th October 2024

Dear Parents/Carers,

Year 5 & 6 Menstruation/Periods discussion

As a school, and taking your feedback, we strongly believe that both girls and boys should learn about menstruation/periods during their time with us.

Like last year, we feel it would be beneficial for the Year 5 girls to have an opportunity to discuss this in school during this half term, on their own, to learn about what might happen, the signs and the resources available in school.

As you will know, children show signs of puberty at different ages, and the average age for starting periods is between 10-15. There will be some children who start earlier and some who start later. We understand the benefits of both boys and girls knowing about this, and we will revisit this later in the year for the rest of Year 5 and 6, during our unit 'Growing and Changing'.

If you would like to know more information, please don't hesitate to get in touch. If you would prefer that your child does not take part in the menstruation talk during this half term, please speak to a member of Upper Key Stage Two Staff.

Our best wishes,

The Year 5/6 Team
